ASJAD KHAN

IT User Support | Mobile Devices & Telecommunications | End-User Support
Brownstown, MI | (734) 450-2295 | asjadkhn91@gmail.com | linkedin.com/in/asjad-cybersecurity-role
Portfolio: khan-asjad.github.io | GitHub: github.com/khan-asjad

PROFESSIONAL SUMMARY

IT support professional with 3+ years of hands-on experience issuing, supporting and maintaining tablets and two-way radios for close to 100 users in a fast-paced airport operations environment, including radio dispatching and coordinating repairs with outside vendors, while supervising those same employees. Also brings 4+ years of mobile (Android/iOS) software development and a background in internal auditing, records and management reporting. Holds a Bachelor of Science in Computer Science (U.S. equivalency, NACES-member evaluation, 3.50 GPA) and is completing an M.S. in Cybersecurity at Eastern Michigan University. Comfortable explaining technical issues in plain language to non-technical staff and leaders. Builds hands-on IT labs, including a Windows Server Active Directory domain and PowerShell automation, documented at khan-asjad.github.io.

CORE COMPETENCIES

- **Mobile & Telecommunications:** Tablet and two-way radio deployment, device issuance and check-in/out, radio dispatch communications, equipment troubleshooting, repair coordination with vendors, Android and iOS devices
- **End-User IT Support:** Hardware and software troubleshooting (Windows, macOS), IT tickets and service requests in Jira, first point of contact support, user access and records, user guides and documentation
- **Business & Compliance:** Internal auditing, policy compliance, asset and license tracking, data analysis and reporting, vendor and service provider coordination, records management
- **Systems & Directory:** Active Directory (users, OUs, security groups), Windows Server 2022, DNS, SMB file shares and NTFS permissions, VirtualBox
- **Tools & Technical:** Jira, Microsoft Office (Word, Excel, Outlook, PowerPoint), PowerShell, Git/GitHub, AvTech, Roberto, Dashboard, SQL, Unity, C#, source control and issue tracking
- **Leadership:** Supervising teams of up to ~100 employees, project management, process improvement, staff coordination

TECHNICAL PROJECTS

Active Directory Home Lab | *Windows Server 2022, AD DS, DNS* github.com/khan-asjad/ad-home-lab

- Built a Windows Server 2022 domain (meridian.local) in VirtualBox with a department OU structure, a Disabled Users OU, six role-based security groups and a hidden home-folder share with NTFS permissions.
- Diagnosed a failed server activation (error 0x80072EE7) to a missing gateway on an isolated lab network using ping and ipconfig; activated through a temporary NAT adapter without exposing the domain controller.

IT Support Automation Toolkit | *PowerShell, Active Directory* github.com/khan-asjad/it-support-toolkit

- Wrote and tested four PowerShell scripts in the AD lab: user onboarding (single or bulk from CSV) with naming conventions, OU placement, department groups and home folders; secure offboarding that disables accounts, scrambles passwords and archives group memberships; bulk password reset; and an HTML workstation health report.
- Built in safety features: -WhatIf previews, audit logging tagged with ticket numbers, no passwords in logs, and error handling that continues a bulk run when one record fails. Found and fixed a duplicate-name bug during lab testing.

PROFESSIONAL EXPERIENCE

Prospect Airport Services **Nov 2022 – Present**

Manager & Internal Auditor

Mobile Device, Radio & Equipment Support

- Issue, track and support tablets for a team of close to 100 employees and two-way radios for about 30 of them, keeping every device accounted for from check-out to return.
- Perform radio dispatching: assign staff, relay real-time operational information and coordinate teams across work areas.
- Act as first point of contact for malfunctioning tablets and radios. Troubleshoot issues on site and, when a device can't be fixed, pull it from service, send it to the repair vendor and follow up until it is returned and reissued.
- Log, track and follow up on equipment issues, repair requests and tasks in Jira from report through resolution.
- Keep equipment records and inventory current using asset-tracking tools, so working devices are always available to frontline teams.
- Train new and current employees on using tablets, radios and operational software (AvTech, Roberto, Dashboard), and answer day-to-day how-to questions.

Operations Management & Internal Audit

- Supervise close to 100 employees at a time, directing customer service operations and internal audits and ensuring 100% compliance with company policies.
- Developed audit processes that improved operational transparency and reduced compliance gaps.
- Implemented software tools (AvTech, Roberto, Dashboard) that improved audit reporting accuracy and streamlined asset and license tracking.
- Analyze employee performance and customer data to identify service trends and prepare reports and recommendations for management.
- Communicate company policies and procedural changes to staff and ensure they are followed.
- Partner with sales and marketing teams to align service and compliance goals with company strategy.

Freelance **Jun 2021 – Present**
Mobile Game Developer (Android / iOS) *Remote*

- Design and build mobile games in Unity and C# for clients, and test and troubleshoot builds on Android and iOS phones and tablets.
- Resolve code issues and bugs, optimize performance and deliver post-launch updates.
- Work directly with clients to gather requirements and explain technical options in plain language.
- Lead playtesting sessions to find user experience issues and recommend improvements.
- Maintain source control and issue tracking to ensure timely delivery and smooth collaboration.

Spartans Global Pvt Ltd **May 2017 – Mar 2021**
Lead Game Developer *Pakistan*

- Led planning, development and launch of 12+ mobile games for Android and iOS with strong market performance.
- Integrated third-party ad network platforms, coordinating with outside providers, generating $10,000+ in monthly revenue.
- Tracked bugs, feature requests and development tasks in Jira, prioritizing and assigning work so issues were resolved before release.
- Wrote technical documentation covering game logic, mechanics and level design.
- Increased development efficiency by 25% through optimized workflows.

PMA House Trust **Oct 2011 – Apr 2017**
Administrative Assistant *Pakistan*

- Managed a 12-person administrative team and provided desktop support for office hardware and software.
- Oversaw financial reporting and communication with partner institutions.
- Created and maintained internal documentation, proposals and reports using SaaS tools for version control and collaboration.
- Recruited and supervised 15 volunteers for annual outdoor medical camps.

EDUCATION

Eastern Michigan University **In Progress**
Master of Science in Cybersecurity *Ypsilanti, MI*

Bachelor of Science in Computer Science — U.S. Equivalency
The Evaluation Company (TEC), NACES member · Evaluated Oct 2024 · 126 U.S. credits · 3.50 GPA

Evaluated as equivalent to a B.S. in Computer Science from a regionally accredited U.S. institution, based on:

- M.S. in Computer Science, Preston University, Pakistan (2016)
- Bachelor of Commerce, University of the Punjab, Pakistan (2013) — U.S. equivalent: Associate's degree in Business Administration

Relevant coursework: Advanced Computer Networks, Operating Systems, Computer Architecture, Management Information Systems, Windows Professional, Relational Database Management Systems, SQL/PL-SQL, Advanced Internet Technologies, Advanced Web Development, Distributed Systems, Business Communication & Report Writing, Auditing

ADDITIONAL INFORMATION

- Valid Michigan driver's license; able to travel between work sites.
